

MacBook Codes

Run this in a terminal under the jamf (admin) user account to force a password change prompt after typing in the default for TPS...

```
/usr/bin/pwpolicy -u TPS -setpolicy "newPasswordRequired=1"
```

Run this in a terminal to install Rosetta 2 on M1 and M2 processor MacBooks to allow Intel apps and executables to run.

softwareupdate -install-rosetta -agree-to-license (those are double-dashes before "install" and "agree")

sudo dscl . create /Users/jamf IsHidden 1 Hide the jamf user from local MacBook

Uninstall uniFLOW

```
sudo bash /etc/smartclient/uninstall-smartclient.bash
```

Rebuild Spotlight and Finder search index

```
sudo mdutil -E /
```
