

I am being redirected when I try to log into my CAA Gmail account

If Google redirects you to your CCA log-in or inbox when you try to log into your personal account OR if Google redirects you to your personal account when you try to log in to your CCA account your browser history is causing this issue. Clearing the history will fix the issue but this solution is temporary because the browser history will save the page/site and cause the same problem in the future.

Internet history, also known as **browser history**, is a tool or resource in a **Web** browser that keeps track of sites and pages that a user visits. Through tabulating URLs, **Internet history** facilitates a quick reference or lookup of previously visited pages.

The best solution to this problem is to add a second account:

1. Log into your CCA account (Log out of your personal account first if you are logged into it.)
2. Click the **Google Apps** icon in the upper right-hand corner.
3. Click **Add another account**.
4. Log in with the email address and password of your personal account.

To switch back and forth between these two accounts, click on the **Google Apps** icon in the upper right-hand corner and choose the account you want to view from the list.
